Voice-Controlled Interfaces: A Logical Flight Distribution Channel Or Just A Weird Gadget?

Date	Time	Location
March 7, 2019	13:00 - 13:30	Hall 6.1, eTravel Stage

Man-machine interfaces using natural language recognition are gaining traction in our private lives. Consumer expectations are changing rapidly and the travel industry should embark if it wants to be close to its customers. Gain insights from the world's first use-case for voice-controlled flight bookings.

NDC Aviation Voice Recognition Channel Management
